- 83 Technical information
- 88 Voltage variants

Welcome to the new look Jenway analytical catalogue. Jenway is renowned for its electrochemistry and spectroscopy scientific instrumentation, specialising in UV/visible spectrophotometers, flame photometers and portable and laboratory meters for the measurement of dissolved oxygen, pH and conductivity. Applications for the products are diverse and include areas such as food manufacturing, medical, pharmaceutical, agricultural, water related and educational markets.

This edition introduces many new products:

- The long awaited addition of the small, scanning UV/visible spectrophotometer to the 63 series; the new 6315 now completes the range.
- The new look bench electrochemistry range coupled with new advanced pH electrodes provide the perfect solution for analysis within the laboratory.
- The 6800 double-beam spectrophotometer. A first for Jenway, the extensive range of spectrophotometers has been expanded to include a double-beam unit.
- New flame photometers

We hope the larger catalogue with the improved layout makes choosing the correct product much easier than ever before. The technical section includes useful information on selecting the best spectrophotometer for your application and many other useful facts and figures relating to the use of the products.

Jenway products are manufactured in an ISO9001:2000 environment and every step from new product development to after sales service follows documented and traceable procedures. The result is a high standard of service and quality-focused culture committed to total customer satisfaction.

All electrical products produced by Jenway conform to the latest safety directives including the European CE requirements. For total compliance, all products are tested and approved by a fully accredited external test house. We are compliant with the Waste Electrical and Electronic Equipment directive, WEEE and the Restriction of the use of Certain Hazardous Substances, RoHS as introduced in 2006.

All the products featured in this catalogue are available through a wide range of national and international distributors. Technical and application advice is available from the qualified scientists of the Technical Support team at jenwayhelp@bibby-scientific.com. For your local distributor details and up-to-date product information please visit our Jenway website at www.jenway.com. Here you will also find software downloads, as well as information on news and events, exhibitions and seminars, frequently asked questions, and much more. The Jenway brand is committed to providing the very best in electrochemistry and spectroscopy instrumentation as well as the highest level of service, before, during and after the sale.

# Some of the most famous names in science...

One of the largest broad based manufacturers of labroatory products worldwide, Bibby Scientific Ltd provides internationally recognised brands with reputations for product quality and high performance. These famous brands are now brought together in a single package to offer an excellent level of quality, service and support.

We manufacture one of the largest ranges of benchtop equipment available under three famous brand names.

# stuart

The extensive Stuart<sup>®</sup> range includes blood tube rotators, colony counters, hotplates, hybridisation ovens, rockers, shakers, stirrers and water purification systems.

Techne<sup>®</sup> is a world leader in the manufacture of temperature control equipment, including water baths, Dri-Block<sup>®</sup> heaters, and molecular biology products such as hybridisation incubators and thermal cyclers.

Jenway<sup>®</sup> makes a wide range of scientific instruments including UV/Vis spectrophotometers, flame photometers, colorimeters, portable and laboratory meters for the measurement of dissolved oxygen, pH, conductivity and specific ions.

# Chloride Meters

Jenway chloride meters are designed for use in the determination of chloride concentrations in various clinical, food and industrial samples. In fact, all samples can be tested provided that they are of low ionic strength, neutral pH, have low levels of dissolved solids and solid matter and are free from silver halides or other components which may react with the silver electrodes.

## Chloride Meter

## PCLM3 Chloride Meter

- For clinical or industrial applications
- Uses proven coulometric titration principle
- Three sample volumes: 20 and 100µl for clinical and 500µl for industrial
- Simple to operate
- Fast reliable results
- Automatic indication when reagent replacement or electrode cleaning is required

The PCLM3 chloride meter can be used to determine chloride concentrations in numerous types of samples. Biological samples such as serum, plasma, urine, sweat and cerebrospinal fluid are commonly tested. Other samples can be tested provided they are of low ionic strength, neutral pH, have low levels of dissolved solids, low solid matter and are free from silver halides and other components which may react with silver.

# JENWAY Colorimeters

Jenway colorimeters are ideal for routine basic colour measurements across the visible range of wavelengths from 400 to 710nm. The easy-to-use controls make also makes them suitable for use in education.

Page 4 - Bench Colorimeter Page 5 - Accessories

## Colorimeters

## 6051 Bench Colorimeter

- Wide wavelength range from 400 to 710nm
- Ideal for routine and educational use •
- Easy to use and conventional style controls •
- Sample flexibility with many size options •
- Mains or battery operated

The 6051 is a general purpose colorimeter, equipped with easy-to-use conventional style controls, making it ideal for routine and educational use.

Standard 10mm square cuvettes, semi-micro volume cuvettes, flow-through or pour in/suck out cells can all be used with the standard sample holder. Excellent sampling flexibility is achieved through the optional cell holder assemblies, allowing the use of 10, 20, and 40mm cells, whilst multiple sampling handling is possible with the four cell carriage. For temperature-dependent measurements a heated cell block is available.

## Meet Your Exact Requirements

Jenway are proud to announce the launch of a new, break-through range of UV/Vis spectrophotometers. With easily removable and interchangeable sampling accessories which include peltier temperature control, sipper pumps and automatic multi-position sample holders these models are designed to support your work routine. With expandable memory capable of storing thousands of methods and results, printer and datahandling options, the 67 series can be configured to meet YOUR exact requirements while being ready for the demands of all users today and into the future.

- Colour TFT LCD display
- Touch-screen interface
- QWheel<sup>™</sup> navigation
- Easy-to-use operation
- Secure multi-user operation
- Multi-media memory card compatiable

www.bibby-scientific.com

The Jenway range of conductivity meters encompasses seven units ranging from basic portable units and waterproof portables, right through to advanced combined pH and conductivity laboratory meters. All the Jenway meters, even the basic ones have automatic standard recognition to ensure the accuracy of results. Additional modes of analysis such as salinity and resistivity are available on selected units and many are compliant with GLP, providing date stamped and downloadable results.

## 470 Enterprise Conductivity/TDS Meter

- Portable conductivity and TDS meter
- Automatic range selection for optimum resolution
- Automatic or manual calibration
- Storage of up to 32 readings
- 500 hours battery life

The 470 hand held conductivity/TDS meter allows calibration by direct cell constant entry or through the use of standard solutions. The display simultaneously shows temperature compensated conductivity or TDS and temperature. For optimum resolution the best conductivity/TDS range is automatically selected, whilst temperature compensation is achieved using an adjustable temperature coefficient.

## 4150 and 4200 Premier Conductivity /TDS Meters

- Portable and waterproof
- Storage of up to 100 results •
- Automatic standard recognition, with manual override
- 1 to 3 point calibration
- User selectable temperature coefficient
- Battery indicator with adjustable auto-switch off feature

The Premier units are housed in sealed cases, which along with the screw-on connectors of the compatible probes ensure the units are fully protected against water ingress. The 4200 has additional resistivity, salinity and pure water options in addition to the standard conductivity, TDS and temperature modes and results can be downloaded or printed via the interface cradle.

## 4510 Bench Conductivity/TDS Meter

- Simultaneous display of conductivity or TDS and temperature
- Automatic selection of range for best resolution
- Calibration by cell constant or standard solutions
- Automatic standard recognition
- Storage of up to 32 results
- Bi-directional RS232 link to printer or PC

The 4510 is easy to use but with the flexibility to meet the broadest range of applications and for those where greater accuracy is required the 4510 has automatic conductivity standard recognition and endpoint detection. Set-up options include cell constant, temperature coefficient and reference temperature. The instrument can store up to 32 readings, which can also be sent to a printer or transferred to computer via DataWay and the RS232 interface.

## 4520 Bench Conductivity/TDS Meter

- Conductivity, resistivity, TDS and salinity modes
- Special pure water mode for ultra low conductivity measurements
- Storage of 500 results with built in data logger
- Infra-red data link (IrDA) for connection to printer and RS232 link to connect to printer or PC via DataWay software

The 4520 is a high specification laboratory conductivity /resistivity /TDS/salinity and temperature meter that offers additional accuracy with 1, 2 or 3 point conductivity calibration across the wide measurement range of 0 to 19.995. The dedicated 'pure water' mode ensures the optimum accuracy for this difficult application.

## 430 Enterprise Conductivity/pH Meter

• Simultaneous display of pH, conductivity and temperature

- Automatic or manual calibration
- Combined pH, conductivity and temperature probe
- Power on self check routine
- Auto-selecting ranges for both TDS and conductivity modes

The easy to use 430 is designed to readily withstand the rigours of field work, while reliably measuring pH and conductivity. The unit allows the simultaneous readout of pH, conductivity or TDS and temperature with switched ranges for both conductivity and TDS measurements.

## 3540 Bench Combined Conductivity/pH Meter

- Simultaneous display of pH and conductivity
- 2 independent channels to prevent interference between probes
- Additional modes for resistivity, salinity, TDS and mV
- Data logger with auto save/print options
- Storage of up to 500 readings (250 for each mode)

The 3540 is ideal for use in all laboratories where pH and conductivity analyses are required. The setup menu gives quick and easy access to the whole range of instrument, pH and conductivity measurement options. Calibration of both channels is automatic, with the option to select 1, 2 or 3 calibration points. The pH channel can also display mV values if required.

# Intelligent Fluorimetry

Jenway's new filter fluorimeters provide the smart solution to the selective and sensitive determination of a wide variety of analytes. An innovative Total Energy Transfer (TET) measurement system ensures maximum sensitivity, with minimum thermal impact, from the high-energy xenon light source. The ergonomic user interface with intuitive operation is supported by programmable methods, password protected to ensure the integrity of your data.

Using Jenway's unique Intelligent Filter Modules (IFM) you can be certain that the correct excitation and emission filters have been fitted for every defined method.

Raw fluorescence values and concentration results are clearly displayed with the automatically set system gain. For the most accurate measurements up to six standards can be used to construct calibration curves. For more information about Jenway's high sensitivity, low cost, easy to use, intelligent

solutions to sample analysis, visit www.jenway.com

Measuring to your requirements www.bibby-scientific.com

Dissolved oxygen measurements are a standard method in water quality analysis. As this technique is often performed out in the field the Jenway range of dissolved oxygen (DO<sub>2</sub>)

meters includes basic and waterproof portables, as well as an advanced laboratory meter. Accessories for Biological Oxygen Demand (BOD) analysis are available for both portable and bench units.

## 970 Enterprise Dissolved Oxygen Meter

- Portable and ideal for field work
- Results as % air saturation, % oxygen or mg/l
- Automatic calibration
- Manual atmospheric pressure and salinity correction
- Storage of up to 32 results

The 970 is a general purpose, hand held dissolved oxygen meter that combines accurate measurement and ease of use in a robust, ergonomic case. The display simultaneously shows % dissolved oxygen or oxygen concentration (mg/l) and temperature. All readings are automatically corrected for temperature with the option to manually enter corrections for pressure and salinity. The 970 is supplied with a single probe with integrated temperature measurement, allowing automatic temperature compensation as standard.

## 9500 Bench Dissolved Oxygen Meter

- Results as % air saturation, % oxygen or mg/l Automatic zeroing and calibration
- Atmospheric pressure and salinity correction
- BOD<sup>5</sup> measurement and calculation
- RS232 for connection to printer or PC and IrDA for cableless printing option

The 9500 is a research meter designed for use in a number of applications including fish farming/breeding, all forms of aquaculture, environmental analysis, pollution control and effluent management. The 9500 includes powerful data logging capabilities with the ability to store 250 DO2 readings either manually, at timed intervals or on alarmed events. The 9500 also includes full support for the BOD<sup>5</sup> day test protocol and has the ability to store up to 25 BOD data sets, each with up to 10 samples.

# Flame Photometers

Flame photometry is the only accurate analytical method for determining certain ions concentrations and the Jenway instruments are the ideal, low cost option for measuring sodium, potassium, lithium, barium and calcium. Models for clinical or industrial samples are available.

## PFP7 Industrial Flame Photometer

- Designed for industrial analysis
- Supplied with Na, K, Li, Ba and Ca filters
- Low temperature, single channel
- Flame failure safety system
- Operates with propane, butane, natural gas or LPG

The PFP7 is a low temperature, single channel flame photometer that is designed for the routine determination of sodium, potassium, calcium, barium and lithium concentrations. The flame failure safety system makes these products ideal for use in industrial and educational environments. The use of fine and coarse sensitivity controls allows for accurate measurements each and every time.

#### **Technical Specification**

| Range               | 0 to 199.9ppm  |
|---------------------|--|

Note: This product will only operate with the correct type of compressor and gas regulator as specified.

PFP7

PFP7

### 2.25 Flame Photometers sensitivity

## **PFP7/C** Clinical Flame Photometer

- Designed for clinical analysisSupplied with Na, K and Li filters
- Low temperature, single channel
- Flame failure safety system •
- Operates with propane, butane, natural gas or LPG •

The PFP7/C is a low temperature, single channel flame photometer that is specifically designed for use in clinical applications for the determination of sodium, potassium and lithium. The in-built lineariser circuitry of the PFP7/C enables readings of both sodium and potassium to be displayed directly in mmol/l. The series 7 diluter is available for use with the PFP7/C to enable serum samples to be diluted efficiently and accurately to the required ratios.

- Standard curve and kinetic functions
- Heated sample holder and sipper pump accessories
- Compatible with DataWay PC software

Three models are available to cover a wide range of applications. The 6280 model is ideal for the most sensitive determinations with emission wavelengths up to 650nm. When higher emission wavelengths are required the 6285 with its red-enhanced detector is the unit of choice. For less sensitive applications and a broader wavelength range up to 1100nm the low cost 6270 unit is more suitable.

With press-to-read operation and Total Energy Transfer (TET) technology the output of the high-energy xenon lamp is maximised and its expected life extended so that it should never need replacing within the normal lifetime of the unit. The high quality optics are complemented by the Intelligent Filter Modules (IFM) that are identified by the unit, generating error messages should the wrong filters be fitted or their positions be incorrect.

Each model offers intuitive operation with a user interface based on logical menus that can be navigated from the simple keypad. Up to 20 methods can be created without restriction and saved for future use. They can also be locked against accidental change by password entry. The permanent time and date tag on every stored reading supports Good Laboratory Practice, while calibration reminders and operator identity can also be entered to support conformance and traceability of results.

All models are powered from an external, universal mains adapter suitable for use from 90V to 230V, while the 12V DC input enables use in vehicles or from suitable battery packs.

Note: Excitation and emission filters are not included and should be purchased as separate items. Please refer to the filter section.

### Fluorimeter Accessories

### Sipper Pump

The programmable peristaltic sipper pump can be adjusted by the operator to inject a repeatable volume of sample or standard into the chamber of a flow-through cuvette. Other options are:

- Add an air gap to separate samples
- Wash cycle
- Move sample to waste container or return to original vessel
- Pump sample continuously for monitoring a bulk or flowing sample

#### **Technical Specification**

Continuous aspiration modeFlow rate dependant on tubing bore:<br/>12ml/min with supplied tubingTimed aspiration modeSample/air gap/washSample volume75µl to 9.5mlSegment run timeUp to 48 secondsSize (w x d x h)205 x 190 x 160mmWeight1.5kg

### Heated Cell System

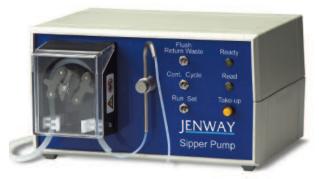

The electrically heated cell holder with its digital control unit ensures samples are always at the same temperature. This can be very important as fluorescence is inversely proportional to temperature, so care must be taken if comparing samples at different ambient temperatures. Temperature can also affect other sample properties, for example the rate of enzymatic reactions.

#### **Technical Information**

| Temperature range   | Ambient +2°C to 60°C   |  |
|---------------------|------------------------|--|

### Fluorimeter Accessories

### PC Software

DataWay PC software allows unlimited storage of programs, results and graphs. It has powerful graphing functions that allow overlays of data for comparison of results. Alternatively data can be exported to other analysis programs such as Excel™.

| Ordering Information |   |  |  |  |
|----------------------|---|--|--|--|
| Part Code            | Description   |  |  |  |
| 050 501              | DataWay software on a CD-ROM, includes spectrophotometer/fluorimeter interface cable (013 210) and electrochemistry interface cable (013 203) |  |  |  |
| 037 551              | RS232 to USB convertor for connection to PCs without serial ports   |  |  |  |

### Field Analysis

When portability or field analysis is important any 62 fluorimeter can be accommodated in the tough carry case.

All the Jenway fluorimeters can be powered from any mains supply (100 to 230V) or a 12V DC supply. When being used in a vehicle an optional cable with a vehicle auxiliary socket (cigarette lighter) can be used. A number of independent battery packs are also available.

### Cuvettes

### Fluorimeter Accessories

### Fluorimeter Filters

There are 3 types of filter for the Jenway fluorimeters. The bandpass filters are ideal as excitation filters as they allow only the light between the specified wavelengths through to the sample. For example, UG1 allows all the light between 320 and 380nm through and excludes the light below 320nm and above 380nm. The cut-off and interference filters are normally used as the emission filters where a much narrower range of wavelengths is required. The cut-off filters block all light below the specified wavelength and the interference filters allow the specified wavelength and light +5nm of this through to the sample.

#### **Ordering Information**

| Part Code | Description                        |
|-----------|------------------------------------|
| 627 126   | UG1, 320 to 380nm bandpass filter  |
| 627 124   | BG28, 380 to 500nm bandpass filter |

# JENWAY Hotplate/ Stirrers

All three ranges of Jenway stirrers, hotplates and hotplate stirrers have a chemically resistant ceramic top plate which makes them suitable for any application. The 1200 range offers a larger heating area for those who need to heat larger vessels or sample volumes and for those customers requiring increased accuracy, PTR temperature probes are available, allowing the actual sample temperature to be measured.

Page 36 - Hotplates, Stirrers and Hotplate Stirrers

### Hotplate/Stirrers

### Hotplates, Stirrers and Hotplate/Stirrers

- Chemically resistant ceramic top plate
- Easy to clean
- Accurate heat control
- Powerful stirring action
- Larger plate and PTR probe options

Jenway have 3 ranges of hotplate, stirrers and combined hotplate/stirrers, all with ceramic top surfaces and with the hotplates having a maximum plate temperature of 450°C. The 1000 series are economic units that offer the performance required for even the most demanding applications with a powerful stirring action of up to 2000rpm. The units in the 1100 and 1200 ranges offer greater accuracy in temperature control and the option of a PTR temperature probe for accurate sample temperature control. The 1200 units also have a larger plate area for larger sample volumes.

### Measuring up

<u>JENWA</u>

DPH & Conductivity Meter

CAI

CLA

With a combination of advanced features and sophisticated software, the new Jenway 3540 pH & Conductivity Meter makes analysis of water and environmental samples simpler than ever.

- Split screen shows pH and conductivity measurements simultaneously.
- Menu options including adjustable temperature coefficient, reference temperatures and calibration settings
- Displays Resistivity, Salinity and TDS readings
- Good laboratory practice (Cal reminder, Cal status and secure set up)
- Comprehensive GLP and data logging functions
- Quick and simple operation

For more information about Jenway's high sensitivity, low cost, easy to use, intelligent solutions to sample analysis, visit www.jenway.com

Measuring to your requirements

For some ions the only method to accurately determine low concentrations is via an ion meter in combination with an ion-specific electrode (ISE). Jenway offers a large selection of ISEs and buffers to enable concentrations from as little as  $1 \times 10^{\circ}$  to  $9.99 \times 10^{\circ}$  to be measured.

Page 40 - Portable Ion/pH MetersPage 41 - Bench Ion MetersPage 42 - AccessoriesPage 43 - Ion Selective ElectrodesPage 44 - Consumables

### 3205 Premier Portable Ion/pH Meter

- Combined pH and ion portable, waterproof meter
- Ammonium, calcium, chloride, fluoride and nitrate ion measurements
- Up to 2 point pH and 5 point ion calibration
- Automatic buffer recognition
- Fully GLP compliant
- RS232 interface using optional cradle
- 6 language options

The 3205 portable ion meter is dedicated to the rapid, easy and reliable determinations of ammonium, calcium, chloride, fluoride and nitrate ions with concentrations displayed in mg/l, ppm, %, moles, activity or no units. When performing dedicated ion analysis appropriate ATC parameters will be automatically selected and when combined with the very stable electrode readings all calibrations can be performed in the laboratory prior to analysis in the field. Although customised for dedicated ion analysis the 3205 can also perform measurements of pH, mV and other, non-dedicated ion measurements.

#### **Ordering Information**

#### Part Code Description

539 501 3205 pH and ion meter supplied with pH/temperature probe (027 227), buffer sachets, waterproof connector to S7 electrode lead (013 161), waterproof connector to BNC electrode lead and batteries

### 3340 and 3345 Bench Ion Meters

- 1 to 5 point ion calibration
- Dual channel ion/ion or ion/pH
- Automatic temperature compensation ion and pH measurements
- Fully GLP compliant
- Direct potentiometry (3340 and 3345)
- Full support of incremental methods (3345 only)

The 3340 and 3345 laboratory pH/ion meters offer a host of valuable features whilst retaining simplicity of operation through the use of structured menus. Both models will store up to 100 readings all of which can be recalled on the LCD screen or down loaded to a printer or PC. Details of the last calibration results are time and date stamped, thus satisfying the requirements of GLP quality assurance protocols.

The 3345 offers additional flexibility with two additional modes of ion analysis: the known addition/subtraction mode allows the determination of ion concentrations much closer to the lower detection limits of the electrodes, whilst multiple sample addition/subtraction allows measurements to be performed in dense and concentrated matrices.

#### **Technical Specification**

| рН                           | 1, 2 or 3 point calibration  |
|------------------------------|--|
| Range                        | -2.000 to 19.999   |
| Resolution                   | 0.1, 0.01, 0.001   |
| Accuracy                     | ±0.003   |
| Automatic buffer recognition | 4, 7 and 10.05 (with manual override)  |
| mV                           |  |
| Range                        | ±1999  |
| Resolution                   | 0.1mV  |
| Accuracy                     | ±0.2mV   |
| Temperature                  |  |
| Range                        | -10 to 105°C   |
| Resolution                   | 0.1°C  |
| Accuracy                     | ±0.5°C   |
| ATC Range                    | 0 to 100°C   |
| lon                          | Multipoint calibration 1 to 5 points   |
| Activity                     | 1x10 <sup>.9</sup> to 9.99x10 <sup>.9</sup>  |
| Concentration units          | Activity, %, ppm, mg/l, M or none  |
| Clock                        | 24 hour, leap year corrected   |
| GLP                          | Calibration reminder interval (1 to 999 hrs  |
|                              | Timed printout interval  |
| Outputs                      | Analogue and RS232   |
| Connectors                   | 2 x BNC (ion/pH), 5-pin DIN (temperature),<br>2mm pin (separate reference electrode) |
| Power                        | 9V AC 230V   |
| Size (l x w x d)             | 275 x 240 x 150mm  |
| Weight                       | 1.2kg  |

### Ion Meters Accessories

| 548 001 | 3345 dual channel ion meter supplied with glass  |
|         | combination pH electrode (924 005), swing arm electrode  |
|         | holder, BNC to S7 leadless connector (013 173) for   |
|         | connection to ISEs ATC probe (027 222) buffer cochots  |

connection to ISEs, ATC probe (027 232), buffer sachets and UK power supply

### Temperature Probes and Connectors

#### **Ordering Information**

| Product Code | Description                                |
|--------------|--|
| 013 161      | Premier to S7 leadless electrode connector |
| 027 232      | ATC/temperature probe                      |
| 013 173      | BNC to S7 connector                        |

### Printers

#### **Ordering Information**

| Product Code | Description   |
|--------------|---|
| 543 001      | 40 column serial printer with interface cable, paper, ribbon and UK power adapter |
| 542 001      | Interface cradle supplied with interface cable kit<br>(542 009)                   |
| 060 287      | Paper roll  |
| 060 288      | Printer ribbon  |

### Miscellaneous

| Product Code | Description                         |
|--------------|-------------------------------------|
| 033 162      | 3205 carry case                     |
| 544 008      | Dust cover                          |
| 903 200      | Swing arm electrode holder          |
| 555 001      | Bench stirrer, powered by ion meter |

### Ion Selective Electrodes

A large number of standard ion selective electrodes (ISEs) are available for use with the Jenway ion meters. The available options include easy to use combined electrodes, separate ion-specific and reference electrodes for increased flexibility or for challenging applications the Jen-Flow Plus combination electrodes.

| lon            | Combination Part Code | Mono Part Code |
|----------------|-----------------------|----------------|
| Ammonia        | 924 328               | -              |
| Ammonium       | 924 302               | 924 500        |
| Barium         | 924 307               | 924 501        |
| Bromide        | 924 308               | 924 502        |
| Cadmium        | 924 309               | 924 503        |
| Calcium        | 924 301               | 924 504        |
| Carbonate      | 924 311               | 924 505        |
| Chloride       | 924 304               | 924 506        |
| Copper         | 924 313               | 924 507        |
| Cyanide        | 924 314               | 924 508        |
| Fluoride       | 924 305               | 924 509        |
| lodide         | 924 316               | 924 510        |
| Lead           | 924 317               | 924 511        |
| Magnesium      | 924 326               | 924 522        |
| Mercury        | 924 318               | 924 512        |
| Nitrate        | 924 300               | 924 513        |
| Perchlorate    | 924 321               | 924 515        |
| Potassium      | 924 322               | 924 516        |
| Silver         | 924 323               | 924 517        |
| Sodium         | 924 329               | 924 521        |
| Sulphide       | 924 324               | 924 518        |
| Thiocyanate    | 924 325               | 924 519        |
| Water Hardness | 924 327               | 924 523        |

Note: ISEs are supplied without the connecting lead and the mono electrodes require a reference electrode to complete the system.

### Jen-Flow Plus Combination Electrodes

- Drift-free readings with complex samples
- Fast response
- Longer lifetime
- Robust, solid state sensing and reference elements
- Easy to clean and maintain

#### **Ordering Information**

| Ordering into | Ordering information                          |  |
|---------------|---|--|
| Part Code     | Description                                   |  |
| 924 702       | Ammonium Jen-Flow Plus combination electrode  |  |
| 924 701       | Calcium Jen-Flow Plus combination electrode   |  |

### Ion Selective Electrode Kits

| Part Code Description |  |  |  |
|-----------------------|--|--|--|
| 924 402               | Ammonium electrode kit comprising ammonium ISE, 1 bottle 1000ppm calibration standard, 1 bottle ISAB and BNC to S7 lead    |  |  |
| 924 401               | Calcium electrode kit comprising calcium ISE, 1 bottle of 1000ppm calibration standard, 1 bottle ISAB and BNC to S7 lead   |  |  |
| 924 404               | Chloride electrode kit comprising chloride ISE, 1 bottle of 1000ppm calibration standard, 1 bottle ISAB and BNC to S7 lead |  |  |
| 924 405               | Fluoride electrode kit comprising fluoride ISE, 1 bottle of 1000ppm calibration standard, 1 bottle ISAB and BNC to S7 lead |  |  |
| 924 400               | Nitrate electrode kit comprising nitrate ISE, 1 bottle of 1000ppm calibration standard, 1 bottle ISAB and BNC to S7 lead   |  |  |

The Jenway pH meters range from basic and waterproof portable units, right through to advanced combined pH and conductivity laboratory meters. All models, except the 3505 which is specifically designed for use in education have automatic standard recognition to ensure the accuracy of the results. Redox and ion concentration modes are available on some of the models.

### 350 Enterprise pH Meter

- Simultaneous pH and temperature display
- Storage of up to 32 results
- Automatic or manual calibration 500 hours battery life
- Application specific electrodes and consumables

The 350 is a general purpose portable pH meter offering 1 or 2 point pH calibration and automatic buffer recognition with manual override. It simultaneously displays both the temperature compensated pH readings and the manually set temperature.

### 370 Enterprise Portable pH/mV Meter

- pH, absolute and relative mV ranges
- Automatic or manual calibration
- Automatic or manual temperature compensation
- Simultaneous pH and temperature reading
- Storage of up to 32 results

The 370 hand held pH/mV meter offers simple, yet professional performance with 1 or 2 point calibration and automatic buffer recognition with manual override. The unit simultaneously displays temperature compensated pH readings or electrode potential and temperature.

A comprehensive range of application specific electrodes and consumables are available for use with the 370 meter.

### 3150 Premier Portable pH/mV/ Temperature Meter

- Waterproof portable meter
- Automatic temperature compensation
- Storage of up to 100 results
- Automatic buffer recognition
- mV and redox modes
- Comprehensive range of electrodes and consumables

The 3150 pH meter is designed to resist the harshest of field, laboratory and industrial environments. The instrument is fully menu driven via a sealed membrane keypad, with all results being displayed simultaneously on the large display.

The pH sensor of the 3150 incorporates a precision temperature element configured to give accurate temperature compensation, as well as a direct readout of temperature in °C or °F.

Through the use of data logging protocols the 3150 automatically stores up to 100 results in its memory ensuring all results are saved, even in the event of battery failure.

### 3205 Premier Portable Ion/pH Meter

- Combined pH and ion portable, waterproof meter
- Ammonium, calcium, chloride, fluoride and nitrate ion measurements
- Up to 2 point pH and 5 point ion calibration
- Automatic buffer recognition
- Fully GLP compliant
- RS232 interface using optional cradle
- 6 language options

The 3205 portable ion meter is dedicated to the rapid, easy and reliable determinations of ammonium, calcium, chloride, fluoride and nitrate ions with concentrations displayed in mg/l, ppm, %, moles, activity or no units. When performing dedicated ion analysis appropriate ATC parameters will be automatically selected and when combined with the very stable electrode readings all calibrations can be performed in the laboratory prior to analysis in the field. Although customised for dedicated ion analysis the 3205 can also perform measurements of pH, mV and other, non-dedicated ion measurements.

#### Ordering Information Part Code Description

539 501 3205 pH and ion meter supplied with pH/temperature probe (027 227), buffer sachets, waterproof connector to S7 electrode lead (013 161), waterproof connector to BNC electrode lead and batteries

3505

### 3505 Bench pH Meter

- General purpose education laboratory pH meter
- Intuitive operation via rotary controls
- pH, temperature and mV mode for redox and electrode diagnosis
- Calibration controls locked during measurement
- Manual or automatic temperature compensation
- Large display
- Battery or mains operated

The 3505 is a simple to use laboratory pH, mV and temperature meter for use in general purpose and educational applications. It utilises rotary controls for mode selection and pH calibration. A novel design feature ensures that inadvertent movement of the calibration controls has no effect during sample measurement. The large display ensures that during demonstrations and when used by groups, all can easily see the clear LCD readout.

### 3510 Bench pH/mV Meter

- Simultaneous readout of pH and temperature ٠
- pH resolution to 3 decimal places
- 1, 2 or 3 point calibration
- Automatic or manual buffer selection
- Storage of up to 32 results
- RS232 connection to printer or PC via DataWay

The 3510 is a versatile, simple to use pH, mV and temperature meter that is ideal for routine analysis. With up to three decimal place resolution and a choice of up to three calibration points the 3510 provides the user with added flexibility where future demands for enhanced performance may be required. A choice of pH calibration buffers to DIN, JIS and NIST standards can be used for automatic calibration, as well as manually entered buffer values.

3520

### 3520 Bench pH/mV Meter

- Ideal for quality control and GLP applications
- Up to 3 decimal place resolution
- 1, 2 or 3 point pH calibration
- Automatic or manual buffer selection
- Multiple language options
- Storage of up to 500 results
- RS232 connection to printer or PC or infra red (IrDA) communication
- GLP compliant

The 3520 dynamic pH/mV meter offers research grade specifications with a comprehensive range of features and functions, making it suitable for the broadest range of research, general laboratory, QC and GLP based applications. The built in data logger can store, print or output readings based on a wide range of trigger options, making this model suitable for monitoring and controlling pH levels.

|           | buffer sachets and UK power supply  |

### 430 Enterprise Conductivity/pH Meter

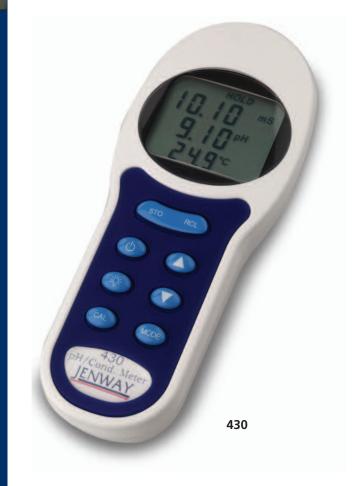

- Simultaneous display of pH, conductivity and temperature
- Automatic or manual calibration
- Power on self check routine
- Calibration diagnostics

The easy to use 430 is designed to readily withstand the rigours of field work, while reliably measuring pH and conductivity. The unit allows the simultaneous readout of pH, conductivity or TDS and temperature with switched ranges for both conductivity and TDS measurements.

Co Po Siz We

### 3540 Bench Combined Conductivity/pH Meter

- Simultaneous display of pH and conductivity
- 2 independent channels to prevent interference between probes
- Additional modes for resistivity, salinity, TDS and mV
- Data logger with auto save/print options
- Storage of up to 500 readings (250 for each mode)

The 3540 is ideal for use in all laboratories where pH and conductivity analyses are required. The setup menu gives quick and easy access to the whole range of instrument, pH and conductivity measurement options. Calibration of both channels is automatic, with the option to select 1, 2 or 3 calibration points. The pH channel can also display mV values if required.

### Application Specific Electrodes

#### **Ordering Information** Part Code Description 924 049 Life science, 6mm micro, 150mm reach, glass bodied for test tubes and small sample volumes (max. temperature 100°C) 924 030 Tris buffer, semi-micro with 90mm reach, glass bodied for pH measurements in biological buffers, blood and protein samples (max. temperature 50°C) 924 050 Environmental, glass bodied, suitable for low ionic strength solutions and purified water (max. temperature 50°C) 924 068 Environmental pH electrode with S7 connector (430, max. temperature 50°C)

- 924 051 Food, epoxy bodied, flat membrane, ideal for measurements of food extracts and agar plates (max. temperature 60°C)
   924 069 Food pH electrode with S7 connector (430, max. temperature 60°C)
- 924 077 Jam electrode, epoxy bodied, ideal for measurements of jam and preserves
- 924 034 Spear knife probe, epoxy based for the measurement of solid samples
- 924 035 Replacement electrode for spear knife probe
   924 076 Difficult applications, glass bodied for measurement of oils, biofuels and non-aqueous samples
   924 079 High temperature probe, glass bodied for measurements up to 110°C
- 924 080 Laboratory electrode, glass bodied for measurement of aggressive chemical solutions

#### Maximum temperature 80°C, unless otherwise stated

|-----------|-------------|

| 027 227 | Waterproof, general purpose, epoxy-bodied with ATC (max. temperature 100°C)  |
|---------|--|
| 924 052 | Waterproof environmental with ATC (max.<br>temperature 50°C)   |
| 924 053 | Waterproof 12mm stem spear type, glass bodied with ATC   |
| 924 054 | Waterproof redox (platinum), glass bodied for redox measurements with ATC  |
| 924 055 | Waterproof Tris buffer, glass bodied for pH<br>measurements in biological buffers, blood and protein<br>samples with ATC (max. temperature 50°C) |
| 924 056 | Waterproof food pH electrode with ATC (max.<br>temperature 60°C)   |
| 538 014 | Adapter lead with waterproof connector to BNC electrode connector  |

### pH Performance Electrodes

- Quickly reach equilibrium
- Significantly reduced response times
- Far greater reproducibility
- Significantly reduced long-term drift

The advanced Jenway Performance pH electrodes are the electrodes of choice for advanced applications where faster response times and greater reproducibility are required.

## JENWAY Spectrophotometers

UV-visible spectroscopy is the measurement of the absorbance of light at a specific wavelength by a sample within the UV or visible region of the spectrum. It is one of the oldest analytical techniques and is used to identify the presence and concentration of many molecular entities. As spectrophotometers are used in many applications and across multiple industries Jenway have five ranges of visible and UV/visible spectrophotometers, designed to suit a wide range of budgets.

\*restricted scanning ±50nm of selected wavelength

There are five ranges of visible and UV/visible spectrophotometers offered by Jenway, which have been designed to suit a wide range of budgets, industries and applications.

The 63 series are entry-level spectrophotometers that range from the 6300 which is ideal for routine analysis to the 6315 UV/visible scanning spectrophotometer that includes spectrum, kinetics and quantitation modes.

The 64 series visible and UV/visible single-beam scanning spectrophotometers incorporate a wide range of features designed to satisfy the needs of users seeking to maximise the efficiency of routine and specialised spectroscopic procedures.

The 65 series are split-beam visible and UV/visible spectrophotometers with modes for photometrics, kinetics, quantitation, multi-wavelength analysis and spectrum scanning. They are designed to provide users with a high quality system, which offers many advanced post-analysis features required to process spectral information.

The 67 series is a range of split beam visible and UV/visible spectrophotometers that possess a host of novel features. These include a colour touchscreen, secure multi-user operation, a full range of plug-in accessory modules and flash synchronised scanning, which allows the 67 series to achieve scan speeds of 1500nm/min, even when scanning at a resolution of 0.1nm.

The 6800 is Jenway's first true double beam UV/visible spectrophotometer that possesses a robust, traditional design that is complemented by the clear and intuitive, Windows-based, Flight Deck PC software.

### Spectrophotometers

### 6300 and 6320D Visible Spectrophotometers

- Wavelength range of 320 to 1000nm
- Absorbance, %T and concentration modes
- Multi-parameter display with wavelength and photometric readouts
- Wide range of sampling accessories
- Domed lid of 6320D accepts tubes up to 105mm tall

The 6300 is a high quality, low cost unit for spectrophotometric applications in schools and colleges, as well as in QC and testing procedures for a wide variety of services and industries. The 6320D is based on the 6300 platform and includes a domed lid which accepts taller tubes up to a height of 105mm.

6300

### Spectrophotometers

### 6305 UV/Visible Spectrophotometer

- Wavelength range of 198 to 1000nm
- Xenon lamp
- Easy and intuitive operation
- Absorbance, %T and concentration modes
- Multi-parameter display with wavelength and photometric readouts
- Wide range of sampling accessories

6305

The 6305 is ideal for applications similar to the 6300 requiring measurements in the UV and visible wavelength ranges. Using a single, pulsed xenon lamp the 6305 offers an extended lamp life and high energy throughput in the UV and visible regions.

### Spectrophotometer

### 6310 Visible Scanning Spectrophotometer

- Spectrum scanning across entire range from 320 to 1000nm
- Concentration measurements by direct factor or by quantitation using up to 6 standards
- Kinetics with real time graphical display of sample and standard
- Store up to 50 methods in each mode

The 6310 visible spectrophotometer introduces scanning, kinetics and quantitation modes to this highly successful format. Complete with method storage and supervisory control functions, the 6310 is ideal for routine testing in clinical, veterinary, pharmaceutical and QC laboratories.

Spectrophotometers

### 6315 UV/Visible Scanning Spectrophotometer

- Spectrum scanning across the entire range from 198 to 1000nm
- Pulsed xenon lamp
- Quantitation using up to 6 standards

The 6315 is an advanced spectrophotometer with modes for photometrics, spectrum scanning, kinetics, concentration and quantitation. The 6315 will meet the demands of a wide range of applications especially those in clinical, veterinary, environmental, general QC and performance testing areas. With a memory capacity of 50 methods for each mode, the fully open operating system ensures compatibility with reagent kits from most manufacturers as well as enabling full customisation.

6315

### Aquanova Environmental Spectrophotometer

- Dedicated to water and environmental testing
- Stores up to 300 test methods
- Pre-loaded with Jenway test kit methods
- Compatible with most commercially available photometric test kits
- Drag and drop test methods from a CD-ROM
- Create new tests using a simple factor or standard curve with up to 6 standards
- PC software included

The Aquanova spectrophotometer and test kits offer the simplest and most convenient laboratory system for measuring a broad range of parameters in water, wastewater, effluent and environmental samples. Although targeted to water and environmental analysis the Aquanova can be used as a standard single beam visible spectrophotometer by selecting the photometrics mode.

Genova

### Genova Life Sciences <u>Spectrophoto</u>meter

- Pre-programmed for DNA/RNA analysis
- DNA purity scan mode
- Pre-loaded protein concentration determination methods
- Standard spectrophotometer functions

The Genova allows the measurement of DNA concentrations and purity ratios using the wavelengths recorded at 260 and 280nm or 260 and 230nm with optional correction at a third wavelength. The purity scan gives a clear, graphic display of DNA purity. This allows any shifted or distorted peaks due to interfering molecules to be identified.

The Genova also contains five pre-programmed methods for the Bradford, Lowry, Biuret, Bicinchonininc acid (BCA) and Direct UV techniques. In all cases the standard procedures may be modified by the user or run as programmed.

#### Technical Specification

| Wavelength         |   |
|--------------------|---|
| Range              | 198 to 1000nm   |
| Resolution         | 1nm   |

### 6400 and 6405 Scanning Spectrophotometers

- 6400 Visible (320 to 1100nm)
- 6405 UV/Visible (190 to 1100nm)
- Single beam scanning units
- Easy to use keypad operation
- 5nm bandpass
- Wide range of accessories

The 64 series scanning units are ideal for all routine teaching, laboratory and research environments. Modes are available for photometrics, spectrum, kinetics, multi-wavelength analysis and quantitation\* using standard curve methods. These units have full scanning capability with three scan speeds and intervals, baseline correction, instant display of scan, automatic axis scaling, peak and valley data display and capacity to store two scans.

Sample flexibility is a key feature, with cells from 100mm path length down to micro sample capacity being readily accommodated. To further increase flexibility a wide range of accessories are also available. \* requires 8 cell changer accessory

### 6500 and 6505 Scanning Spectrophotometers

- 1.8nm spectral bandwidth
- Split beam optics for high performance
- 8-position automatic cell changer supplied as standard
- Compatible with DataWay PC software
- Post scan analysis includes derivatives and spectral addition/subtraction

The Jenway 65 series are advanced split-beam spectrophotometers with modes for photometrics, kinetics, quantitation, multi-wavelength analysis and spectrum scanning. Comprehensive post-measurement and scan options make these very powerful stand alone instruments. Methods can be created and stored in the internal and removable memory along with any results generated. An 8-position motorised cell holder is included as standard, speeding up analysis, automating the creation of calibration curves and offering auto-log functions across all modes of operation.

### Spectrophotometers

### 67 Series Visible and UV/Visible Scanning Spectrophotometers

- Colour touch screen display
- High quality, sealed split beam optics for optimum photometric performance
- Secure multi-user operation
- Save to SD/USB memory cards
- Enhanced productivity
- Extensive range of accessories for flexibility and improve productivity

All three instruments have modes for photometrics, spectrum scanning, multi-wavelength analysis, kinetics and quantitation, giving direct concentration results against single or multi-point calibrations. With extensive post measurement tools to ensure results are presented exactly to each users requirements the 67 series also offers significant advances in data portability.

Together, the touch screen and colour display give the fastest, most flexible instrument interface possible. Where fine cursor control is required, using the QWheel<sup>™</sup> makes the task easy and precise.

Jenway have developed Secure Multi User Operation for when instruments are shared by a number of users, so access to the instrument functions is controlled through a secure log-in procedure. For maximum security PIN codes can be allocated to individuals, groups or departments and to further increase flexibility each method can be given three levels of security:

| Public    | Access is free to all users.                      |
|-----------|---|
| Read only | Methods can be accessed by all users, but only    |
|           | modified by the originator.                       |
| Personal  | Method can only be accessed by the logged in user |

The high capacity internal memory of the 67 series can be configured from 256MB, enabling over 1000 methods and results to be stored, up to 2GB, which stores more than 10,000 methods and results.

Removable SD or SD/USB memory cards further increases the flexibility and data transfer and enables the direct transfer of results to a PC via a USB port. Here all data can be viewed, exported, saved or printed for generating reports and standard operating procedures. Copying the SD card to the instrument's internal memory enables the easy cloning of multiple instruments, ensuring common laboratory practice and speeding set-up in busy teaching establishments.

### 67 Series Accessories

The 67 series has been specifically designed to enhance productivity and simply adding an accessory automatically sets the instrument operating parameters. The automated eight position and temperature controlled six position cell holders are the key to improved productivity. Using the dedicated Automation option up to seven samples can be measured sequentially with all results saved or printed automatically.

NAY

CMU/ Oor

The Peltier controlled cuvette holder allows precise control of temperature control in the range of 20 to 50°C to a resolution of 0.1°C. A programmable sipper pump enables controlled volumes to be injected into micro and standard flow-through cuvettes. For sensitive applications a combined peltier sipper module is also available. A full range of passive sample holders can also be easily fitted.

68 Series

### Spectrophotometers

### 68 Series UV/Visible Double Beam Spectrophotometer

- Double beam spectrophotometer with highly stable optics
- 1.5nm spectral bandwidth
- Jenway Flight Deck software included as standard

With the 6800 Jenway introduces the first double beam spectrophotometer to the range. The highly stable optics and 1.5nm spectral bandwidth ensures high resolution and accuracy on every measurement. The Jenway Flight Deck software offers modes for all common measurement methods: photometrics and multi-wavelength, spectrum scanning, time scan and kinetics, quantitation, DNA/RNA and protein measurements. With extensive post-measurement tools and easy export to Excel® the 6800 ensures that all results are presented exactly to your requirements.

#### **Technical Specification**

| Wavelength               |  |
|--------------------------|--|
| Range                    | 190 to 1100nm  |
| Resolution               | 0.1nm  |
| Accuracy                 | ±0.3nm   |
| Repeatability            | ±0.1nm   |
| Spectral bandwidth       | 1.5nm  |
| Photometrics             |  |
| Transmittance            | 0 to 600%T   |
| Absorbance               | -3.0000 to 3.0000A                                     |
| Accuracy                 | ±0.3%T   |
|                          | ±0.002A at 0 to 0.5A, ±0.004A at 0.5 to 1.0A,          |
|                          | ±0.008A at 1.0 to 2.0A                                 |

### 6800 Series Accessories

#### **Ordering Information**

#### Part Code Description

supplied)

| 680 081 | Single 10 x 10mm cell holder for standard measurements   |
|---------|--|
| 680 031 | Micro cell holder for medical and biochemical<br>applications where sample volumes are strictly limited,<br>allows measurements of sample volumes down to 50µl |
| 680 131 | Water heated cell holder for use where sample<br>temperature is critical. This allows absolute temperature<br>control from ambient to 40°C                     |
| 680 101 | Film holder used to record measurements of filters and film-like samples   |
| 680 061 | Glass filter holder allows the measurement of solid sheet samples for thickness from 0.5mm up to 5mm   |
| 680 111 | Rectangular long path cell holder, which can accept cell<br>lengths of 10, 20, 30, 40, 50 and 100mm  |
| 068 020 | Tungsten halogen lamp (6800)   |
| 068 021 | Deuterium lamp (6800)  |

### Cuvettes

### Disposable Cuvettes and Test Tubes (10mm path length unless stated)

| Part Code | Description  |
|-----------|--|
| 060 084   | Pack of 100 plastic cuvettes, visible wavelengths only, 2.4 to 4.5ml fill volume                                       |
| 060 229   | Pack of 500 plastic cuvettes (5 boxes of 060 084)  |
| 060 087   | Pack of 100 plastic cuvettes, visible wavelengths only, 1.5 to 3.0ml fill volume                                       |
| 060 230   | Pack of 100 plastic cuvettes, UV and visible wavelengths, 2.5 to 4.5ml fill volume                                     |
| 060 232   | Pack of 500 plastic cuvettes (5 boxes of 060 230)  |
| 060 231   | Pack of 100 UV plastic cuvettes, 1.5 to 3.0ml fill volume  |
| 035 143   | Pack of 100 plastic cuvettes, UV and visible wavelengths,<br>70µl to 1.5ml fill volume (use with micro cuvette holder) |
| 060 331   | Pack of 100 glass test tubes (12 x 75mm)   |
| 060 179   | Pack of 100 plastic test tubes (12 x 75mm)   |
| 060 335   | Pack of 50 glass test tubes (24 x 150mm)   |

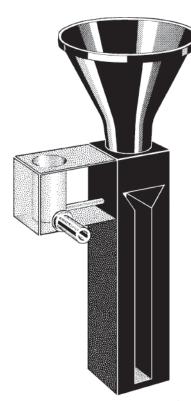

# Glass and Quartz Cuvettes

| Part Code | Description                               |
|-----------|---|
| 035 027   | Visible (glass) 10mm path length cuvette  |
| 035 086   | Visible (glass) 20mm path length cuvette  |
| 035 029   | Visible (glass) 40mm path length cuvette  |
| 035 087   | Visible (glass) 50mm path length cuvette  |
| 035 079   | Visible (glass) 100mm path length cuvette |
| 035 123   | Visible (glass) micro (500µl) cuvette     |
| 035 126   | Visible (glass) semi-micro (1ml) cuvette  |
| 035 028   | UV (quartz) cuvette (2.0 to 3.5ml)        |
| 035 124   | UV (quartz) ultra micro (50µl) cuvette    |
| 035 125   | UV (quartz) micro (500µl) cuvette         |
| 035 127   | UV (quartz) semi-micro (1ml) cuvette      |
| 035 138   | UV (quartz) ultra-micro (100µl) cuvette   |
| 035 139   | UV (quartz) ultra-micro (200µl) cuvette   |
| 035 249   | UV (quartz) ultra-micro (20µl) cuvette    |

Flow Cells (10mm path length unless stated)

#### Part Code Description

| 035 026 | Pour in/Suck out cell                   |
|---------|---|
| 035 025 | Visible (glass) flow-through cell 1.8ml |
| 035 045 | Visible (glass) flow-through cell 80µl  |
| 035 044 | UV (quartz) flow-through cell 1.8ml     |
| 035 047 | UV (quartz) flow-through cell 80µl      |

### TrayCell

- Ideal for DNA, RNA and protein measurements
- Sample volumes as low as 0.7µl
- Sample concentration range from 25 to 4250µg/ml
- Sample is simply wiped away after the measurements, making the TrayCell quick and easy to use
- Prevents dilution and pipetting errors
- Fits all standard 10 x 10mm cuvette holders

The TrayCell is a fibre optic cuvette which can be used with as little as  $0.7\mu$ l of sample. The cuvette has two caps which give path lengths of either 1mm or 0.2mm, thus creating a 'virtual dilution' of 1:10 or 1:50 of the sample when compared to a measurement with a standard 10 mm cuvette

#### **Technical Specification**

| Light Path          | 0.2mm or 1mm  |
|---------------------|---------------|
| Error of light path | ± 0.02mm      |
| Volume              | 0.7-5µl       |
| Wavelength range    | 190 to 1100nm |
| Maximum temperature | 50°C          |

#### **Ordering Information**

| Part Code | Description  |
|-----------|--|
| 035 262   | Tray Cell for ultra-micro sample volumes from 0.7 to 5 $\mu$ l compatible with Genova, 6705 and 6715 spectrophotometers, supplied complete with caps for 1mm and 0.2mm path length operation |
| 035 263   | Replacement 1mm path length cap for TrayCell   |
| 035 264   | Replacement 0.2mm path length cap for TrayCell   |

### Service & Repair

Our dedicated service staff are on hand to help in the unlikely event that your Jenway equipment develops a fault. Please contact them by one of the following means with a clear description of the problem:

E-mail: service@bibby-scientific.com Tel: +44 (0) 1785 810475 Fax: +44 (0) 1785 810471

On occasion it may be necessary for your equipment to be sent back to our Service Department for repair. In this case please contact the Service Department for a reference number which you should include with your faulty equipment. Please also ensure you include a clear description of the fault and a completed copy of our Decontamination Certificate. This is available as a downloadable pdf file at www.jenway.com, or contact us and we will be happy to fax you a copy. Please clearly mark the package for the attention of the Service Department and post to the following address:

Bibby Scientific Ltd T/As Jenway Beacon Road Stone Staffordshire ST15 0SA United Kingdom

All replacement parts are guaranteed for 6 months and where ever possible, returned equipment is turned around in 5 working days.

Please contact our Service Department for further information on onsite repairs and equipment calibration services.

### **Technical Support**

Jenway have a dedicated Technical Support team who are on hand to help with any applications advice and questions you may have about our products and how to use them. The team is made up of experienced laboratory scientists whose backgrounds include chemistry, biochemistry, cell and molecular biology. There are two fully equipped laboratories which are used for developing applications, testing new products and assisting with customer protocols. We aim to respond to queries on the same day if at all possible. If you have any technical queries concerning any of our products you may call our dedicated Technical Support phone line or email us at the following address:

E-mail: jenwayhelp@bibby-scientific.com Tel: +44 (0)1785 810433 Fax: +44 (0) 1785 810471

#### <u>JENWAY</u>

### **CE** Conformity

At Jenway we rigorously test our electrical products against the CE and safety standards in place. In addition, the majority of our products are independently tested by an accredited test house. This is reinforced by comprehensive technical and manufacturing data which is available for inspection upon request. Copies of the Confirmity Certificates may be downloaded from our website www.jenway.com

### WEEE & RoHS Regulations

The Waste Electrical and Electronic Equipment legislation ("the WEEE Regulations Directive 2002/96/EC") is now in force in the UK. The primary purpose of the WEEE directive is the prevention of waste electrical and electronic equipment, and to require the re-use, recycling and other forms of recovery as to reduce such waste disposal to landfill or incineration.

The restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2005 ("the RoHS Regulations Directive 2002/95/EC") have now been passed into UK legislation. The primary purpose of these regulations is to restrict the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) in new electrical and electronic equipment put on the market in the European Union after July 1, 2006.

As a responsible manufacturer, Bibby Scientific will comply with such regulation as it affects our products and will continue to promote "clean" environmental manufacturing practices.

### ISO9001:2000

The Jenway quality assurance system was first approved in 1992, and is currently certified to the International Quality Standard BS EN ISO 9001:2000. This means that Jenway is committed to providing the highest quality products, services and customer satisfaction.

The scope of our certificate No. FM537210 is: Marketing, design, manufacture and service of analytical and electrochemical instrumentation.

Further details of certification may be downloaded from our website: www.jenway.com

### Selecting a Spectrophotometer

#### Do you need a visible or a UV/visible spectrophotometer?

UV-Visible spectroscopy is the measurement of the absorbance at a specific wavelength by a sample within the UV or visible regions of the spectrum. It is one of the oldest analytical techniques and is used to identify the presence and concentration of many molecular entities. Therefore the first question to ask is whether a visible or UV/visible spectrophotometer is required? The near UV region is considered to be from 200 to 380 nm and the visible region from 380 to 800 nm. Jenway have extended the ranges of some of the visible and UV/visible spectrophotometers up to 1100 nm, which is considered to be in the NIR part of the spectrum.

#### Is scanning capability required?

Many applications require an option for spectrum scanning i.e. measuring the absorbance at each wavelength within a region of the spectrum. However some laboratories only require scanning to 'trouble shoot' the occasional problem. The cost of the instrument is significantly reduced if scanning is not required.

#### What types of samples are being measured?

The majority of samples in UV/visible spectroscopy are liquid which are usually measured in 10mm glass or quartz silica cuvettes depending upon the wavelength range required. Glass is only suitable for the visible region, whereas quartz must be used in the UV region and is also useable in the visible region. A 10mm cuvette typically holds 2 to 3ml of sample. However for applications such as DNA or protein assays where the amount of sample is limited Jenway offer micro cell holder accessories and micro cuvettes that allow the accurate measurement of volumes down to 20µl. With the TrayCell sample volumes as low as 0.7µl can be used. For extra sensitivity in sample measurement Jenway offer a range of long path cell holders up to 100 mm. Some specific applications require measurement of solid samples for which Jenway provides glass filter and film holder accessories.

#### Optics system: single beam or double beam?

Jenway spectrophotometers are available with single, split-beam or double beam optics. Single beam spectrophotometers are lower cost instruments, with the baseline to compensate for changes in lamp output intensity and blank absorbance being stored prior to taking the sample measurement. The instrument automatically compensates for the stored baseline when the sample is measured. In contrast double beam instruments record the sample and reference simultaneously, resulting in the instrument electronics compensating for the reference in real time. Double beam instruments tend to offer better stability in the UV region and are necessary when the blank or sample solutions are unstable or transient.

#### Which light source?

UV/visible spectrophotometers generally use two light sources to ensure the spectral irradiance is of sufficient intensity over the entire wavelength range. In these instruments the most common light sources used are tungsten halogen lamps for the visible range and deuterium lamps for the UV wavelengths, with a source selector to switch between the lamps. Jenway also offer a range of UV/visible and visible spectrophotometers that use a pulsed xenon lamp. The pulsed xenon lamp offers a good intensity continuum over both the UV and visible parts of the spectrum and has the added advantage of a much increased expected lifetime.

#### Is it a requirement to store methods and results?

To speed up the time taken for sample processing and to reduce user error, modern laboratories often have the requirement for spectrophotometers to save both methods and results. Jenway spectrophotometers offer a range of storage media from internal memory storage through to removable media such as SD and SD/USB cards.

#### Is it necessary to increase sample throughput?

In commercial laboratories the need to increase sample throughput and reduce sample handling leads to the need for automated sample introduction by using either a multi-cell changer or a sipper system. Multi-cell changers can be used in manual or automatic operation and are often used for enzyme kinetic assays. Sippers improve sample throughput by using a peristaltic pump to introduce precise volumes of sample into a flowcell.

#### Is sample temperature control required?

Some analyses such as enzyme kinetics require the absorbance change to be measured over time and often require the sample's temperature to be controlled electrically (peltier control) or by circulating water through the sample holder. Temperature control options are available for all Jenway spectrophotometers.

#### Does the spectrophotometer need to be connected to a PC?

Different measurements can require a differing degree of post-scan data manipulation. Jenway spectrophotometers offer a wide-range of post scan manipulation options and all can be connected to a PC.

# Spectrophotometric Quantitation of Nucleic Acids

| Spectrophotomeric Conversions             |                             |
|---|-----------------------------|
| A <sub>260</sub> = 1 (1cm detection path) | Concentration (µg/ml water) |
| dsDNA                                     | 50                          |
| ssDNA                                     | 33                          |
| ssRNA                                     | 40                          |
| Oligonucleotide                           | 20 - 30                     |

Pure DNA has an  $A_{260}/A_{280}$  ratio of 1.8-2.0 in 10mM Tris-Cl, pH 8.5 Pure RNA has an  $A_{260}/A_{280}$  ratio of 1.9-2.1 in 10mM Tris-Cl, pH 7.5

#### Flame Photometry: Wavelengths of Elements

When sodium is introduced into a flame, it emits a radiation in the yellow region of the visible spectrum. The table below gives details of the measurable atomic flame emissions of the alkali and alkaline earth metals in terms of the emission wavelength and the colour produced.

| Element       | Emission Wavelength (nm) | Flame Colour |
|---------------|--------------------------|--------------|
| Barium (Ba)   | 554                      | Lime Green   |
| Calcium (Ca)  | 662*                     | Orange       |
| Lithium (Li)  | 670                      | Red          |
| Potassium (K) | 766                      | Violet       |
| Sodium (Na)   | 589                      | Yellow       |

\*Note: Calcium is measured by using the calcium hydroxide band emission at 622nm as the calcium main atomic emission occurs at 423nm.

Jenway Product Catalogue

### Voltage Variants

### Chloride Meters

| Part Code | Description   |
|-----------|---|
| 504 055   | PCLM3 clinical chloride meter supplied with buffer, gelatin, clinical chloride standard, 3 silver electrodes, 2 silver anodes, electrode polish, glass beaker, stirrer and tweezers (110V/60Hz)     |
| 504 057   | PCLM3 industrial chloride meter supplied with buffer, gelatin, industrial chloride standard, 3 silver electrodes, 2 silver anodes, electrode polish, glass beaker, stirrer and tweezers (110V/60Hz) |

### Colorimeters

#### Part Code Description

605 078 6051 colorimeter supplied with 8 in-built filters, 10 x 10mm cell holder, mains lead and plastic cuvettes (115V/60Hz)

### **Conductivity Meters**

| Part Code | Description   |
|-----------|---|
| 451 101   | 4510 conductivity meter supplied with glass conductivity probe with ATC (K=1) (027 013), electrode holder and US power supply   |
| 451 201   | 4510 conductivity meter supplied with glass conductivity probe with ATC (K=1) (027 013), electrode holder and EU power supply   |
| 451 301   | 4510 conductivity meter supplied with glass conductivity probe with ATC (K=1) (027 013), electrode holder and 230V leaded power supply  |
| 452 101   | 4520 conductivity meter supplied with glass conductivity probe with ATC (K=1) (027 013), electrode holder and US power supply   |
| 452 201   | 4520 conductivity meter supplied with glass conductivity probe with ATC (K=1) (027 013), electrode holder and EU power supply   |
| 452 301   | 4520 conductivity meter supplied with glass conductivityn probe with ATC (K=1) (027 013), electrode holder and 230V leaded power supply   |
| 354 101   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and US power supply          |
| 354 201   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and EU power supply          |
| 354 301   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and 230V leaded power supply |
| 543 201   | 40 column serial printer with interface cable, paper roll (060 287), ribbon (060 288) and EU power adapter (4200)   |
| 543 501   | 40 column serial printer with interface cable, paper roll (060 287), ribbon (060 288) and US adapter (4200)   |

### Voltage Variants

### Dissolved Oxygen Meters

| Part Code | Description  |
|-----------|--|
| 950 101   | 9500 dissolved oxygen meter supplied with DO <sup>2</sup> probe with ATC (522 023), electrode holder, spare membranes, KCI fill solution, zero calibration salts, adapter bush and US power supply       |
| 950 201   | 9500 dissolved oxygen meter supplied with DO <sup>2</sup> probe with ATC (522 023), electrode holder, spare membranes, KCI fill solution, zero calibration salts, adapter bush and European power supply |
| 950 301   | 9500 dissolved oxygen meter supplied with $DO_2$ probe with ATC (522 023), electrode holder, spare membranes, KCI fill solution, zero calibration salts, adapter bush and 230V leaded power supply       |

### Flame Photometers

| Part Code | Description   |
|-----------|---|
| 500 731   | PFP7 industrial flame photometer supplied with Na, K, Ba, Ca and Li filters, connecting hoses and clips, compressor plug and drain trap (110V/60Hz) |
| 500 831   | PFP7/C clinical flame photometer supplied with Na, K and Li filters, connecting hoses and clips, compressor plug and drain trap (110V/60Hz)         |
| 535 002   | Air compressor (110V/60Hz)  |
| 037 002   | Series 7 diluter (110V/60Hz)  |

### Fluorimeters

Part Code Description

632 031 Sipper pump, supplied with inlet and outlet tubing (110V/60Hz)

### Hotplate/Stirrers

| Part Code | Description   |
|-----------|---|
| 100 151   | 1001 hotplate (110V/50/60Hz)  |
| 120 151   | 1201 hotplate (110V/50/60Hz)  |
| 100 251   | 1002 stirrer supplied with stirrer bar (110V/60Hz)  |
| 100 051   | 1000 hotplate/stirrer supplied with stirrer bar (110V/60Hz)   |
| 110 051   | 1100 hotplate/stirrer supplied with stirrer bar (110V/60Hz)   |
| 120 051   | 1200 hotplate/stirrer supplied with stirrer bar (110V/60Hz)   |
| 110 351   | 1103 hotplate/stirrer supplied with stirrer bar, temperature probe, probe holder and retort rod (110V/60Hz) |
| 120 351   | 1203 hotplate/stirrer supplied with stirrer bar, temperature probe, probe holder and retort rod (110V/60Hz) |

# Voltage Variants

### Ion Meters

| Part Code | Description   |
|-----------|---|
| 547 101   | 3340 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode holder, ATC probe (027 232), buffer sachets and US power supply   |
| 547 201   | 3340 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode<br>holder, ATC probe (027 232), buffer sachets and EU power supply  |
| 547 301   | 3340 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode<br>holder, ATC probe (027 232), buffer sachets and 230V leaded power supply   |
| 548 101   | 3345 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode<br>holder, BNC to S7 leadless connector (013 173) for connection to ISEs, ATC probe (027 232), buffer sachets<br>and US power supply          |
| 548 201   | 3345 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode<br>holder, BNC to S7 leadless connector (013 173) for connection to ISEs, ATC probe (027 232), buffer sachets<br>and EU power supply          |
| 548 301   | 3345 dual channel ion meter supplied with glass combination pH electrode (924 005), swing arm electrode<br>holder, BNC to S7 leadless connector (013 173) for connection to ISEs, ATC probe (027 232), buffer sachets<br>and 230V leaded power supply |

### pH Meters

| Part Code | Description   |
|-----------|---|
| 351 101   | 3510 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffers and US power supply  |
| 351 201   | 3510 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffers and European power supply  |
| 351 301   | 3510 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffers and 230V leaded power supply                                     |
| 352 101   | 3520 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffer sachets and US power supply                                       |
| 352 201   | 3520 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffer sachets and European power supply                                 |
| 352 301   | 3520 pH/mV meter supplied with glass combination pH electrode (924 005), electrode stand and holder,<br>ATC probe (027 500), BNC shorting plug, pH 4, 7 and 10 buffer sachets and 230V leaded power supply                              |
| 354 101   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and US power supply          |
| 354 201   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and EU power supply          |
| 354 301   | 3540 conductivity/pH meter supplied with glass combination pH electrode (924 005), glass conductivity probe (K=1, 027 013), electrode stand and holder, ATC probe (027 500), BNC shorting plug, pH buffers and 230V leaded power supply |

#### Part Code Description

| 630 531            | 6300 visible spectrophotometer supplied with mains lead, pack 100 disposable cuvettes, 10 x 10mm cell<br>holder, interface cable and PC application software on CD-ROM (110/60Hz)              |
|--------------------|--|
| 632 521            | 6320D visible spectrophotometer supplied with mains lead and dual cell holder (for 10mm square cuvettes and 12.7mm diameter tubes) (110V/60Hz)   |
| 635 031            | 6305 UV/visible spectrophotometer supplied with mains lead, pack 100 disposable cuvettes, 10 x 10mm cell holder, interface cable and PC application software on CD-ROM (110V/60Hz)             |
| 631 031            | 6310 visible, scanning spectrophotometer supplied with mains lead, pack 100 disposable cuvettes, 10 x<br>10mm cell holder, interface cable and PC application software on CD-ROM (110V/60Hz)   |
| 631 531            | 6315 UV/visible scanning spectrophotometer supplied with mains lead, pack 100 disposable cuvettes, 10 x<br>10mm cell holder, interface cable and PC application software on CD-ROM (110V/60Hz) |
| 637 031            | Aquanova visible spectrophotometer supplied with mains lead, 9 way serial cable (013 203) and PC software (603 436) (110V/60Hz)  |
| 636 031            | Genova UV/visible life sciences spectrophotometer supplied with mains lead, 8 x 750µl UV plastic cuvettes,<br>and cell holder (110V/60Hz)  |
| 636 035            | Genova UV/visible life sciences spectrophotometer supplied with TrayCell, mains lead, 8 x 750µl UV plastic cuvettes and cell holder (110V/60Hz)  |
| 632 031            | Sipper pump, supplied with inlet and outlet tubing (110V/60Hz)   |
| 037 202            | Water bath and circulator, ambient +5 to 50°C for use with 648 001 (115V/60Hz)   |
| 543 201            | 40 column printer supplied with interface cable, paper roll (060 287) and ribbon (060 288) and EU power adapter  |
| 543 501<br>037 602 | 40 column printer supplied with interface cable, paper roll (060 287)and ribbon (060 288) and US adapter<br>Digester for COD determinations, includes 2 blocks for 12 COD tubes each (115V)    |
| 640 031            | 6400 visible, scanning spectrophotometer supplied with pack 100 (3.5ml) disposable cuvettes and mains lead (110V/60Hz)   |
| 640 531            | 6405 UV/visible, scanning spectrophotometer supplied with pack 100 (3.5ml) disposable cuvettes and mains lead (110V/60Hz)  |
| 650 031            | 6500 visible, scanning spectrophotometer supplied with serial mouse, mouse mat, pack 100 (3.5ml) disposable cuvettes, 8-position multi-cell changer and mains lead (110V/60Hz)                 |
| 650 531            | 6505 UV/visible, scanning spectrophotometer supplied with serial mouse, mouse mat, pack 100 (3.5ml)<br>disposable cuvettes, 8-position multi-cell changer and mains lead (110V/60Hz)           |
| 643 031            | Peltier heated cuvette system comprising heated cuvette block and external power supply module (110V, 60Hz) (I   |
| 643 032            | Peltier heated cuvette system comprising heated cuvette block and external power supply module (110V, 60Hz) (I   |
| 647 031            | Temperature controlled sipper system (110V/60Hz) (P)   |
| 647 032            | Temperature controlled sipper system (110V/60Hz) (F)   |
|                    |  |

037 202 Water bath and circulator, ambient +5 to 50°C for use with 648 001 and 649 001 (115V/60Hz)
